Abstract

The National Prisoner Statistics (NPS) data collection began in 1926 in response to a congressional mandate to gather information on persons incarcerated in state and federal prisons. Originally under the auspices of the U.S. Census Bureau, the collection moved to the Bureau of Prisons in 1950, and then in 1971 to the National Criminal Justice Information and Statistics Service, the precursor to the Bureau of Justice Statistics (BJS) which was established in 1979. Since 1979, the Census Bureau has been the NPS data collection agent.

The NPS is administered to 51 respondents. Before 2001, the District of Columbia was also a respondent, but responsibility for housing the District of Columbia's sentenced prisoners was transferred to the federal Bureau of Prisons, and by yearend 2001 the District of Columbia no longer operated a prison system.

The NPS provides an enumeration of persons in state and federal prisons and collects data on key characteristics of the nation's prison population. NPS has been adapted over time to keep pace with the changing information needs of the public, researchers, and federal, state, and local governments.

Summary Data Description

Time Period: 1978 - 2011

Date(s) of Collection: 1978 - 2011

Country: United States

Geographic Coverage: United States

Unit of Analysis: state department of correction

Universe: prisoners under jurisdiction of federal or state correctional authorities in the United States from 1978 to 2011.

Kind of Data: survey data

Methodology and Processing

Data Collection Methodology

Time Method: Cross-section

Sampling Procedure:

Three distinct collections comprise the NPS:

The **NPS-1** is an annual collection known as the "Summary of Sentenced Population Movement." Before 1978, the collection tracked admissions and releases by type and sex during each calendar year, as well as the number of prisoners in custody by sex and sentence length on December 31.

- In 1978, NPS-1 was expanded to include the number of prisoners under the jurisdiction of state and federal adult correctional officials, the number of inmates held in local jails solely to ease overcrowding in prisons, and the race and Hispanic origin by sex of the jurisdiction population at yearend.
- In 1991, NPS-1 was further expanded to include questions on the number of human immunodeficiency virus (HIV) infections and confirmed acquired immune deficiency syndrome (AIDS) cases in the custody population.
- In 1999, the NPS-1 was expanded again to collect data on inmates housed in local facilities without reference to prison overcrowding, inmates held in other state or federal facilities, and inmates held in privately operated facilities. In addition, the race and Hispanic origin questions were combined into a single item to better comport with administrative recordkeeping systems maintained by state departments of correction (DOCs). Finally, the survey began collecting more detailed counts of inmate deaths by cause.

The **NPS-1A** was introduced in 1981 to track the rapidly growing prison population. It included counts of the number of inmates under jurisdiction and in custody of prisons, by sentence length and sex, on June 30 of each year. This collection was eliminated in 2010 to reduce burden on data respondents.

The **NPS-1B** was added to provide advance counts of the December 31 (yearend) populations and to obtain data by sex, race, and sentence length. It was expanded in 1982 to include counts of inmates housed in local jails because of prison overcrowding, and again in 1983 to provide measures of housing capacity and numbers of early releases due to prison overcrowding.

NPS-1 and **NPS-1B** were merged in 2007 under the title NPS-1B "Summary of Sentenced Population Movement." This single collection captures counts by sex of yearend jurisdiction and custody populations by sentence length; number of prisoners held in local, federal, private, and other state facilities; the race and ethnicity of inmates; types of admissions and releases during the calendar year; prison system capacity; and HIV infections and confirmed cases of AIDS. In 2011, two items were added from the former NPS-1A collection, including the yearend custody counts of noncitizens and inmates age 17 or younger.

The NPS datasets archived here draw from the NPS-1 collection until 2007, when the data were consolidated in the NPS-1B. The counts of noncitizens and persons age 17 or younger have been retained from the NPS-1A.

NPS definitions

NPS items and definitions have been adapted over time to reflect the need and changing nature of corrections.

Sentenced prison population

From its beginning, NPS has attempted to collect data on inmates in state and federal prisons who committed serious crimes, although through its original definition, all adult offenders, regardless of the severity of the crime, were included.

- In 1940, a sentence length requirement was imposed to try to obtain counts of felons as opposed to misdemeanants. Only inmates with a maximum sentence of 6 months or more were included in the definition of sentenced prisoners for NPS.
- In 1971, the definition of a felony sentence was changed and standardized across jurisdictions to be a maximum sentence of more than one year.

The NPS-1B currently asks for custody and jurisdiction counts of all prisoners, including unsentenced inmates, inmates sentenced to one year or less, and inmates sentenced to a maximum of more than one year in prison. The term "sentenced" prison population refers to those inmates sentenced to a maximum of more than one year.

Custody versus jurisdiction

- Study 34540 -

Between 1926 and 1976, the official measure of the prison population was the number of inmates in the custody of state or federal correctional officials. State and federal reporting officials were instructed to count all prisoners physically housed under their authority, regardless of whether they or some other entity had legal authority over the inmates.

As states and the Federal Bureau of Prisons increased their use of local jails and interstate compacts to house inmates, NPS began asking states to report a count of inmates under the jurisdiction or legal authority of state and federal adult correctional officials in addition to their custody counts.

Since 1977, the jurisdiction count has been the preferred measure. This count includes all state and federal inmates held in a public or private prison (custody) and those held in jail facilities either physically located inside or outside of the state of legal responsibility, and other inmates who may be temporarily out to court or in transit from the jurisdiction of legal authority to the custody of a confinement facility outside that jurisdiction.

The difference between the total custody count and the jurisdiction count was small (approximately 7,000) when both were first collected in 1977. As more states began to report jurisdiction counts and more states began to rely on local and privately operated facilities to house inmates, the difference increased. At yearend 2011 the jurisdiction population totaled 1,598,780, while the custody population totaled 1,540,150 (a difference of 58,630 inmates).

Race and Hispanic origin

NPS started collecting data on race and Hispanic origin in 1978; however, the reporting of the data changed over time. While all states could report on the racial distribution of their inmates, Hispanic origin was reported as unknown for nearly a third of all inmates as late as 1984. In some states this high level of non-reporting was the result of collecting Hispanic origin separately from race, when the prisoner records combined them in a single field. In other states, the prison system did not collect data on Hispanic origin at all, or collected them as a separate racial classification.

In 1997, the Office of Management and Budget published new regulations for the classification, collection, and presentation of federal statistical data on race and ethnicity (http://www.whitehouse.gov/omb/fedreg_1997standards) to better enumerate persons of Hispanic or Latino origin, multiple races, and more specific racial categories. While federal agencies had until January 1, 2003, to comply with the new standards, non-federal entities, including state DOCs, were not bound by the regulations. Most state DOCs have adopted the federal guidelines, although some still cannot meet the regulation due to older information systems that do not record race and Hispanic origin in the standard format.

The determination of race and Hispanic origin differs across states. In some states DOCs, inmates are asked to self-identify race and ethnicity at time of admission, some rely on information in the arrest or court documents accompanying the prisoner at admission, in others prison officials classify the inmates visually upon entrance to the facility. Based on comparisons of race and ethnicity data recorded on administrative records from the NPS and inmate self-identification data obtained from inmate surveys, Hispanic inmates and inmates identifying as more than one race are underrepresented in the NPS. BJS uses the inmate surveys to adjust for the NPS undercount in its annual Prisoners reports (<http://www.bjs.gov/index.cfm?ty=pbse&sid=40>). NPS race and ethnicity data available to the public at the National Archive of Criminal Justice Data (NACJD; <http://www.icpsr.umich.edu/icpsrweb/NACJD/>) are the unadjusted counts originally reported by the states.

Citation Requirement: Publications based on ICPSR data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications.

Deposit Requirement: To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, users of ICPSR data are requested to send to ICPSR bibliographic citations for each completed manuscript or thesis abstract. Visit the ICPSR Web site for more information on submitting citations.

Notes

Variables CNOPRIVM, CNOPRIVF, CWPRIVM, and CWPRIVF were created by BJS starting in 1999 to address the fact that some states were counting their private prisons in their custody counts, but others were not. Users should use these variables rather than CUSTOTM and CUSTOTF when they use 1999-current data in their analyses.

Variable Description

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

1978 State notes on submitted data

Text:

StateID: 34

State: NJ

Variable: (use created variable name) All178

Note: Prisoners in local jails are not considered by the State to be under its jurisdiction. They are included in the total State prisoner count used to calculate the percentage of State prisoners held in local jails.

StateID: 51

State: VA

Variable: (use created variable name) All178

Note: Prisoners in local jails are not considered by the State to be under its jurisdiction. They are included in the total State prisoner count used to calculate the percentage of State prisoners held in local jails.

StateID: 98

State: All

Variable: All178

Note: Standard NPS definitions of the various categories of admissions and releases are included in the questionnaire. Generally, State inmates housed in local jails because of overcrowding are considered to be under State jurisdiction, and only exceptions to this rule are noted. Some States included an adjustment residual in their admission or release figure in order to balance the yearend 1977 count with the yearend 1978 count.

State: All

Variable: All179

Note: Generally, State inmates housed in local jails because of overcrowding are considered to be under State jurisdiction, and only exceptions to this rule are noted. Note: Not all States can provide counts using NSP admission and release categories. Therefore, a "0" entry in any category can mean that: (1) the State uses this category of admission or release but had no inmates in the category during 1982; (2) the State uses this category but cannot report the number of inmates in the category; or (3) the State does not use this category.

StateID: 98

State: Al

Variable: All82

Note: As a rule, State inmates housed in local jails because of overcrowding are considered to be under State jurisdiction; only exceptions to this rule are noted. To balance the yearend 1981 count with the yearend 1982 count, some States included an adjustment residual in their admission or release figures.

StateID: 98

State: Al

Variable: All82

Note: Many States cannot distinguish escapees returned from AWOLs returned and escapes from AWOLs. Therefore, these categories are combined. The explanatory notes specify only those cases in which the combined category contains only one of the two items.

- Study 34540 -

Variable: All82

Note: Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, are excluded from the 1980 and 1981 counts for those with maximum sentences of more than 1 year unless the prison portion of the sentence exceeded 1 year, a practice resulting in an understating of these counts. Such persons are included in the count of inmates with maximum sentences of 1 year or less. Yearend jurisdiction count for 1981 includes 1,203 persons held in Federal prisons but under the jurisdiction of the Immigration and Naturalization Service. Persons housed in private contract facilities account for the differences between jurisdiction and custody counts.

Variable: All83

Note: As a rule, State inmates housed in local jails because of overcrowding are considered to be under State jurisdiction; only exceptions to this rule are noted. To balance the yearend 1983 count, some States included an adjustment residual in their admission or release figures.

State: FE

Variable: All83

Note: Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, are excluded from 1982 and 1983 counts for those with maximum sentences of more than 1 year unless the prison portion of the sentence exceeded 1 year, a practice resulting in an understating of these counts. Such persons are included in the count of inmates with maximum sentences of 1 year or less. Yearend jurisdiction count for 1983 includes 1,134 persons held in Federal prisons but under the jurisdiction of the Immigration and Naturalization Service.

State: All

Variable: All184

Note: State inmates housed in local jails because of overcrowding are usually considered to be under State jurisdiction; only exceptions are noted. To balance the yearend 1984 count, some States included an adjustment residual in their admission or release figures.

StateID: 99

State: FE

Variable: All184

Note: The 1983 and 1984 counts of those with maximum sentences of more than 1 year exclude persons who received split sentences longer than 1 year, with the part to be served in prison amounting to less than a year. An understatement of these counts resulted. Such persons are included in the count of inmates with maximum sentences of 1 year or less. Yearend jurisdiction count for 1984 includes 1,612 persons held in Federal prisons under the jurisdiction of the Immigration and Naturalization Service. In 1984 the military transferred 60 male inmates, each with more than a year's sentence, to the jurisdiction of the Bureau of Prisons.

Note: [Sentencing information, partially suspended sentences:] Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to a year or more only when the prison portion of their sentences exceed 12 months. Although the maximum sentences of all such prisoners were more than 1 year, nearly all of them are included with those prisoners having sentences of a year or less. During 1985 there were 1,228 uncounted admissions and an almost equal number of uncounted releases of inmates with partially suspended sentences. As a result, the counts of population, admissions, and releases of inmates with more than 1 year maximum sentences are understated, and the population of inmates with a year or less maximum sentence is overstated.

Note: [Sentencing information, partially suspended sentences:] Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to a year or more only when the prison portion of their sentences exceeds 12 months. Although the maximum sentences of all such prisoners were more than 1 year, nearly all of them are included with those prisoners having sentences of a year or less. During 1986 there were 1,059 admissions and 1,051 releases of inmates with partially suspended sentences. As a result, the counts of population, admissions, and releases of inmates with more than 1 year maximum sentences are understated, and the population of inmates with maximum sentences of a year or less is overstated.

Note: [Sentencing information, partially suspended sentences:] Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeds 12 months. Although the maximum sentences of all such prisoners were more than 1 year, nearly all of them are included with those prisoners having sentences of 1 year or less. As a result, the counts of population, admissions, and releases of inmates with more than 1 year maximum sentences are understated, and the population of inmates with maximum sentences of 1 year or less is overstated.

Note: [Sentencing information, partially suspended sentences:] Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to a year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated.

As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are overstated, and the population count of inmates with 1 year or less maximum sentences is understated.

Note: [Sentencing information, partially suspended sentences:] Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeds 12 months. Although the maximum sentences of all such prisoners were more than 1 year, nearly all of them are included with those prisoners having sentences of 1 year or less. As a result, the counts of population, admissions, and releases of inmates with more than 1 year maximum sentences are understated, and the population of inmates with maximum sentences of 1 year or less is overstated.

Note: The courts have ordered that the Texas Department of Criminal Justice Institutional Division (TDCJ-ID) cannot house more inmates than 95 percent of capacity. Approximately 2,928 beds are exempt from this rule, and the inmates in these beds do not count toward the calculation of 95 percent capacity. The population counts include all inmates within TDCJ-ID; however, the capacity figures exclude the 2,928 exempt beds.

Note: [Sentencing information:] Jurisdiction and custody counts of inmates sentenced to a maximum of more than a year and sentenced to a year or less are not comparable to previously reported data. In previous reporting years, Louisiana reported inmates having sentences of a year or less, however, these persons were actually parole revocations with a remaining sentence equal to a year or less. The original sentences for these persons were greater than 1 year, but when they returned from parole the remaining time on their sentences had decreased to a year or less. Since people with sentences of 1 year or less are not sentenced to Louisiana prisons, all inmates are now reported as having a sentence of more than 1 year.

They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. Note: [Sentencing information:] Jurisdiction and custody counts of inmates with a maximum sentence of more than a year and with 1 year or less maximum sentence are not comparable to 1992 and previously reported data. Prior to 1993, reported inmates with 1 year or less sentence were actually parole revocations with a remaining sentence equal to a year or less. The original sentences for these persons were greater than 1 year, but when they returned from parole the remaining time on their sentences had decreased to a year or less. Since people with sentences of 1 year or less are not sentenced to Louisiana prisons, all inmates are now reported as having a maximum sentence greater than or equal to 1 year.

They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. Nearly all of the inmates with a partially suspended sentence were included with those prisoners having sentences of 1 year or less. Note: [Sentencing information:] Jurisdiction and custody counts of inmates with a maximum sentence of more than 1 year and with 1 year or less maximum sentence are not comparable to 1992 and previously reported data. Prior to 1993, reported inmates with 1 year or less sentences were actually parole revocations with remaining sentences equal to 1 year or less. The original sentences for these persons were greater than 1 year, but when they returned from parole the remaining time on their sentences had decreased to 1 year or less. Since people with sentences of 1 year or less are not sentenced to Louisiana prisons, all inmates are now reported as having a maximum sentence greater than or equal to 1 year.

StateID: 11

State: DC

Variable: All96

Note: [Sentencing information, partially suspended sentences:] Prisoners with partially suspended sentences (part served in prison, part served under probation) are included with the 'inmates with over 1 year maximum sentence' only when the prison portion of the sentence exceeded 12 months. As a result, the population and movement counts of 'inmates with over 1 year maximum sentence' are understated, and the counts of 'inmates with 1 year or less maximum sentence' are overstated.

Variable: All96

Note: [Sentencing information, short sentences:] An undetermined number of inmates housed in neither the District of Columbia jail nor the detention center and having either no sentence or a maximum sentence of 1 year or less, are included in the movement and population counts of inmates with more than 1 year maximum sentences. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are overstated, and the counts of inmates with 1 year or less maximum sentences are understated.

State: LA

Variable: All96

Note: [Sentencing information:] Jurisdiction and custody counts of inmates with a maximum sentence of more than 1 year and with 1 year or less maximum sentence are not comparable to 1992 and previously reported data. Prior to 1993, reported inmates with 1 year or less sentences were actually parole revocations with remaining sentences equal to 1 year or less. The original sentences for these persons were greater than 1 year, but when they returned from parole the remaining time on their sentences had decreased to 1 year or less. Since people with sentences of 1 year or less are not sentenced to Louisiana prisons, all inmates are now reported as having a maximum sentence greater than or equal to 1 year.

Variable: All05
Note: Prisons and jails form one integrated system. Data include total jail and prison population. The number of inmates housed in jails due to crowding is unknown, and is not included in the jurisdiction population count. Jurisdiction totals exclude individuals in electronic and special monitoring programs who are under the jurisdiction of the state of Alaska. There were 81 males and 20 females in special electronic monitoring programs in Alaska on December 31, 2005. Population counts reflect sentence lengths of over 1 year for all felons and 1 year or less for all misdemeanants.

State: KS

Variable: A1105

Note: Population counts of inmates with a sentence of more than 1 year include an undetermined number with a sentence of 1 year or less (as a result of sentencing under the Kansas Sentencing Guidelines Act of 1993). Note that except as noted, the procedures for compiling the NPS-1 for CY 2005 are the same as for CY 2004. The figures in items 2 and 6 reflect the actual count of the jurisdictional population on those dates. Admissions and releases are movements of the custody population, except for items 7d and 8f where identified transfers involving Kansas inmates were not counted. The Kansas Sentencing Guidelines Act with its determinate sentencing structure became effective July 1, 1993. Previously, Kansas had indeterminate sentencing. As a result, most of the admissions and releases reported in this questionnaire involved offenders with "guidelines" or "new law" sentences. For purposes of this report, it is not feasible to differentiate movements of "old law" and "new law" offenders. For example, releases "to post-release supervision" under the new law are included in the parole category (item 8b3), which also contains old law parole releases. Both of these groups of releases are under the same type of post-incarceration supervision by Kansas parole officers.

Variable: All05

Note: During 2005 the return of all Wisconsin inmates placed in out-of-state private correctional facilities was completed. Expanded county jail contracting, additional capacity at an existing facility and the opening of two new facilities made this possible. The stabilization and/or decline in population may reflect a renewed emphasis on treatment (particularly AODA) with an expansion of prison beds available for Alternative to Revocation placements for offenders in the Community. Another contributing factor may have been an Earned Release Program for incarcerated offenders begun in 2004.

On September 1, 1998, the law changed making state responsible inmates have a sentence of one year or more or a sentence of 12 months and 1 day. Inmates with a sentence of 12 months or less are not the responsibility of the State. Population counts for "Unsentenced inmates" include civil addicts who are temporarily absent. They are included because they, like felons, are under the California Department of Corrections' jurisdiction and are typically returned to prison within 30 days. Discrepancies between admissions and releases and within-year change in the prison population are due to incomplete data about inmate movements, such as inmates out to court or readmitted on violations.

State: KS

Variable: All08

Note: Population counts of inmates with a sentence of more than 1 year include an undetermined number with a sentence of 1 year or less (as a result of sentencing under the Kansas Sentencing Guidelines Act of 1993). Admissions and releases are movements of the custody population except for items 7d and 8f where identified transfers involving Kansas inmates were not counted. Previously Kansas had indeterminate sentencing, before the new Sentencing Guidelines Act. Due to a new, electronic reporting system, 2007 admission and release data are not comparable to previous years' counts. Most of the admissions and releases reporting in this questionnaire involved offenders with "guidelines" or "new law" sentence. It is not feasible to differentiate movements of "old law" and "new law" offenders. Certain categories of admissions and releases for CY 2006, CY 2007, CY 2008 and subsequent years will be substantially higher than for previous years (CY 2005 and earlier). These changes have no effect on the offender count at the beginning and end of the year.

State: KS

Variable: A1109

Note: Population counts of inmates with a sentence of more than 1 year include an undetermined number with a sentence of 1 year or less (as a result of sentencing under the Kansas Sentencing Guidelines Act of 1993). Admissions and releases are movements of the custody population except for items 7d and 8f where identified transfers involving Kansas inmates were not counted. Previously Kansas had indeterminate sentencing, before the new Sentencing Guidelines Act. Due to a new, electronic reporting system, 2007 admission and release data are not comparable to previous years' counts. Most of the admissions and releases reporting in this questionnaire involved offenders with "guidelines" or "new law" sentence. It is not feasible to differentiate movements of "old law" and "new law" offenders. Certain categories of admissions and releases for CY 2006 to CY2009 and subsequent years will be substantially higher than for previous years (CY 2005 and earlier). These changes have no effect on the offender count at the beginning and end of the year.

Variable: WHITEM

Note: [Hispanic:] The data recorded in the new enterprise database system for Hispanic is treated as an ethnicity rather than a race and the ethnicity fields are optional at the current time and thus often left blank. Therefore, the numbers for Hispanic race are significantly under-reported, so rather than reporting an incorrect number, Michigan included the relatively small number of cases recorded as Hispanic under the "white" category. Enhancement plans include changing the

ethnicity fields to mandatory fields to be able to report this information in future years.

Note: The reported jurisdiction counts are actual counts for December 31, 2009. On September 1, 1998, the law changed making state responsible inmates have a sentence of one year or more or a sentence of 12 months and 1 day. Inmates with a sentence of 12 months or less are not the responsibility of the State. Although a one year sentence would seem the same as a 12 month sentence, the State is responsible for a one year sentence, while local authorities are responsible for a 12 months sentence. Releases and flow information (items 8 and 9) are based on data reported for calendar year 2009.

Variable: All10

Note: Population counts of inmates with a sentence of more than 1 year include an undetermined number with a sentence of 1 year or less (as a result of sentencing under the Kansas Sentencing Guidelines Act of 1993). Admissions and releases are movements of the custody population except for items 7d and 8f where identified transfers involving Kansas inmates were not counted. Previously Kansas had indeterminate sentencing, before the new Sentencing Guidelines Act. Due to a new, electronic reporting system, 2007 admission and release data are not comparable to previous years' counts. Most of the admissions and releases reporting in this questionnaire involved offenders with "guidelines" or "new law" sentence. It is not feasible to differentiate movements of "old law" and "new law" offenders. Certain categories of admissions and releases for CY 2006 to CY2009 and subsequent years will be substantially higher than for previous years (CY 2005 and earlier). These changes have no effect on the offender count at the beginning and end of the year.

The Bed Capacity may include existing space conversions for permanent, new construction, and modular units if the above requirements are met.
